

GIANNI CHIAPPETTI

PRÉCIS

Hi. I develop and design beautiful interfaces, intuitive experiences, and smart code.

I love coding and I'm passionate about design; this makes me a great web developer. I believe in things like web standards and best practices. Along with my creativity I bring to the table a solid understanding of the DOM, CSS, HTML and an in-depth knowledge of JavaScript and Ruby.

Occasionally I am known to ride a bike.

EXPERIENCE

Freelance
2009 – Now

Code Slingin' Pixel Pusher in Toronto, Canada

Web and mobile development coupled with UI/UX design. Working with, but not limited to; Ruby, JavaScript, Clojure, HTML/CSS — even a bit of C. As a freelancer I am able to explore new technologies and techniques and contribute significantly to the open-source community.

Feature Creep Technology, Inc.
2009 – 2011

Developer & Designer in Toronto, Canada

Interface design and software architecture for high-traffic/high-load web sites. Code base refactoring for performance improvements. Mobile development and interface design for iOS and Android. As a team we pushed our hardware and code to the limits.

GigPark, Inc.
2007 – 2009

Developer & Designer in Toronto, Canada

At GigPark I had the opportunity to work at a startup with some extremely talented people. I contributed to and worked on every level of the web application stack. Using BDD techniques, we worked iteratively taking advantage of test-driven coding practices.

Area 50, Inc.
2007 – 2007

Developer & Designer in Burlington, Canada

As part of both the development and design teams, I helped build web-based solutions and e-learning training portals for high-profile companies such as Labatt's Canada, Bell Canada, and Leon's.

INTERESTS

I contribute to the open source community as often as possible. Many of my open source projects and contributions are used by others on a daily basis. Oddly enough, I would also consider myself quite the outdoorsman; I do enjoy a good hike. I am passionate about what I do and enjoy virtually every facet of development.
